

## Collaboration between nurses and doctors

Plenary Session 1

**Saturday 10 July**  
**08:00 - 09:00**

**Location** Purple Area, Purple Room 8

**Chair** To be confirmed

### **Learning objectives**

Last year the congress could not take place due to the COVID-19 virus. This year the congress will have a special meaning due to the pandemic, and because we are in a part of Europe that was hit particularly hard by COVID-19 last year. In this year we will discuss the collaboration between doctors and nurses as we have seen how important that is in times of crises for good and safe healthcare.

**08:00 - 08:05**

**Welcome to the 22nd International Meeting of the EAUN**

To be confirmed

**08:05 - 08:10**

**Welcome to Milan**

To be confirmed

**08:10 - 08:15**

**Welcome by the Italian Association**

To be confirmed

**08:15 - 08:19**

**In Memoriam**

**08:19 - 08:20**

**1 minute of silence**

**08:20 - 08:35**

**Collaboration between nurses and doctors from a nurse's point of view**

To be confirmed

**08:35 - 08:50**

**Collaboration between nurses and doctors from a doctor's point of view**

To be confirmed

**08:50 - 08:55**

**Presentation of the Ronny Pieters Award**

To be confirmed

**08:55 - 09:00**

**Closing remarks**

To be confirmed

## Castration-resistant prostate cancer

Thematic Session 01

**Saturday 10 July**  
**09:15 - 10:15**

**Location**

Purple Area, Purple Room 8

## Prostate Cancer Special Interest Group: Addressing skeletal issues in metastatic prostate cancer - a multi-professional concern

Thematic Session 03

**Saturday 10 July**  
**10:30 - 11:30**

**Location** Purple Area, Purple Room 8

**Chair** To be confirmed

### **Learning objectives**

Although a higher percentage of men have localised disease at presentation, metastatic prostate cancer remains an important clinical problem. In terms of the number of men with advanced disease and its impact on quality of life, and as a cause of mortality. Osteoblastic lesions in bone are the most common site of metastasis. These frequently are symptomatic and can cause pain, debility, and functional impairment. The treatment of bone metastases in men with prostate cancer is palliative. The goals of treatment are to improve survival, relieve pain, improve mobility, and prevent complications. Approaches which will be discussed in this session as well as the necessity for a multi-professional approach.

**10:30 - 10:35**

### **Introduction**

To be confirmed

**10:35 - 10:50**

### **Back to basics – biology and patient assessment**

To be confirmed

**10:50 - 11:10**

### **Evidence for bone-targeted approaches**

To be confirmed

**11:10 - 11:25**

### **Symptom control and the use of palliative radiotherapy**

To be confirmed

**11:25 - 11:30**

### **Closing remarks**

To be confirmed

## Endourology Special Interest Group: Endourology today - diagnostics, treatment modalities and minimally invasive surgical advancements

Thematic Session 04

**Saturday 10 July**  
**11:45 - 12:45**

**Location** Purple Area, Purple Room 7

**Chair** To be confirmed

### **Learning objectives**

**Stone disease:** To gain an in-depth understanding on the diagnosis and disease process in the formation of kidney stones, risks factors and prevention. To have an update on the current guidelines and emerging technological advancements for stone disease. And explore the role and impact of endourology nurses.

**BPH:** To have an understanding on the diagnosis and disease process of BPH, risk factors as well as the current guidelines and the latest technological advancements/ To explore the role of the endourology nurses and how we can improve our practice in the diagnosis and treatment of BPH.

**Robotics and beyond:** Detailed information on the various robotics procedures and how it changed the urological world. To have a comprehensive discussion on how (MIS) the robot can 'push the boundaries' in dealing with complex and more demanding cases. To explore the significance of an experienced Robotic Surgical Care ZPractitioner in the success of each robotic procedure and in the improvement in theatre efficiency.

**11:45 - 11:50**

### **Introduction**

To be confirmed

**11:50 - 12:05**

### **Stone disease**

To be confirmed

**12:05 - 12:20**

### **Benign prostatic hyperplasia**

To be confirmed

**12:20 - 12:35**

### **Robotics and beyond**

To be confirmed

**12:35 - 12:45**

### **Closing remarks**

To be confirmed

## Prostate cancer information needs of gay and bisexual men

Thematic Session 05

**Saturday 10 July**  
**13:00 - 14:00**

**Location** Purple Area, Purple Room 8

### **Learning objectives**

In spite of the vast amount of research into prostate cancer, sexual orientation is not a piece of information that is routinely collected in cancer registries, nor is it usually asked of men who participated in prostate cancer research studies, which means there is a lack of clarity about the experiences of gay and bisexual men with prostate cancer and uncertainty about their information needs relating to this health issue and advice on sex after prostate cancer treatment.

This session will consider the current information needs based on current available literature and the equality in the level of information available and in addition consider what advice as nurses should we provide to our patients on the impact of anal sex following initial investigations and treatment of prostate cancer.

## Holistic approach to urinary and bowel continence care

Thematic Session 06

**Saturday 10 July**  
**13:00 - 14:00**

**Location** Purple Area, Purple Room 7

**Chair** To be confirmed

**Learning objectives**

This session will present the latest updates on the promotion of holistic assessment and management of urinary and bowel continence care, and address how it will support academic development and excellence in daily continence care practice.

---

**13:00 - 13:05**

**Introduction**

To be confirmed

---

**13:05 - 13:25**

**Promoting excellence in continence care**

To be confirmed

---

**13:25 - 13:40**

**From continence nurse to patient expert in cauda equina syndrome (CES)**

To be confirmed

---

**13:40 - 13:50**

**Difficult case**

To be confirmed

---

**13:50 - 14:00**

**Closing remarks**

To be confirmed

---

## Patient Information: Kidneys and stones

State-of-the-art Lecture 1

**Saturday 10 July**  
**14:15 - 14:45**

**Location** Purple Area, Purple Room 8

**Chair** To be confirmed

### **Learning objectives**

Needs-oriented patient care is characterised by close collaboration between health professionals from different professions. The use of evidence-based patient information makes it possible to impart knowledge to those affected and their relatives and thus to actively involve them in making relevant decisions.

This state-of-the-art lecture will provide an insight into the current evidence in the treatment of patients with kidney and ureteral stones and the patient information developed by the EAU Patient Information Group. Practical implementations and use of this specific patient information might enable nurses to use when patients express the need for more information.

---

**14:15 - 14:20**

### **Introduction**

To be confirmed

---

**14:20 - 14:40**

### **What patients should know about kidney and ureteral stones**

To be confirmed

---

**14:40 - 14:45**

### **Conclusion**

To be confirmed

## The role of clinical experience in the update of the EAUN Guidelines on indwelling catheterisation

State-of-the-art Lecture 2

**Saturday 10 July**  
**14:15 - 14:45**

**Location**

Purple Area, Purple Room 7

**Chair**

To be confirmed

---

**15:00 - 15:05**

**Introduction**

To be confirmed

---

**15:05 - 15:25**

**Indwelling catheterisation guidelines update - What evidence is available and what is the role of clinical experience**

To be confirmed

---

**15:25 - 15:40**

**Interactive discussion**

---

**15:40 - 15:45**

**Closing remarks**

To be confirmed

## The impact of COVID-19 on the delivery of urological care

Specialty Session 2

**Saturday 10 July**  
**15:00 - 16:00**

### **Location**

Purple Area, Purple Room 7

### **Learning objectives**

The last year the COVID-19 pandemic has hit the world and Europe hard. Italy was the first country in Europe to be hit, especially the region around Milan, the city where the congress is held this year. Therefore we want to contribute this session to the urological aspects and consequences of the COVID-19 pandemic. In this session you will learn about the management of the urological team, the rehabilitation of the patients, the quality of life in urological care and the end of life care in COVID-19 patients with urological issues.

## Overcoming challenges in non-muscle invasive bladder cancer care

Thematic Session 08

**Saturday 10 July**  
**16:15 - 17:15**

**Location** Purple Area, Purple Room 8  
**Chair** To be confirmed

**16:15 - 16:20**

**Introduction**  
To be confirmed

**16:20 - 16:35**

**What might NMIBC treatment look like in the next decade - current trials and latest evidence on emerging treatments**  
To be confirmed

**16:35 - 16:45**

**Where are we with Bacillus Calmette–Guérin (BCG)? Shortages, efficacy, safety and practicalities of dose reduction, and alternative treatments**  
To be confirmed

**16:45 - 17:00**

**BCG side effects and quality of life**  
To be confirmed

**17:00 - 17:10**

**The role of dedicated bladder cancer patient support and the launch of the World Bladder Cancer Patient Coalition**  
To be confirmed

**17:10 - 17:15**

**Closing remarks**  
To be confirmed

## (Almost) everything about kidney function

Thematic Session 09

**Sunday 11 July**  
**08:00 - 09:00**

**Location** Purple Area, Purple Room 8

**Chair** To be confirmed

**Learning objectives**

This session is focused on the basics of urology nursing in renal diseases. The urology nurse should know when and why a blood sample or urine test is necessary to detect abnormalities and how to interpret them. In this session you will learn which disease the patient has, based on the blood test or urine sample and how it should be treated.

---

**08:00 - 08:05**

**Introduction**

To be confirmed

---

**08:05 - 08:25**

**Complexity of renal function (general kidney function)**

To be confirmed

---

**08:25 - 08:40**

**Kidney function: Blood test**

To be confirmed

---

**08:40 - 08:55**

**Kidney function: Urine test**

To be confirmed

---

**08:55 - 09:00**

**Closing remarks**

To be confirmed

---

## Nocturia in children and adults

Thematic Session 10

**Sunday 11 July**  
**08:00 - 09:00**

**Location** Purple Area, Purple Room 7

**Chair** To be confirmed

**Learning objectives**

Enuresis is more common among children and nocturia is more common in middle-aged and older adults. Both have a profound impact on the quality of life. Do we know the predictive factors? How can we manage (medical and non medical management)?

---

**08:00 - 08:05**

**Introduction**

To be confirmed

---

**08:05 - 08:20**

**Physiology and pathophysiology**

To be confirmed

---

**08:20 - 08:35**

**Nocturia: Types and differences in definitions in children and adults**

To be confirmed

---

**08:35 - 08:50**

**Nocturia: Predictive factors and management**

To be confirmed

---

**08:50 - 09:00**

**Closing remarks**

To be confirmed

---

## An update on the Educational Framework for Urological Nursing (EFUN) (Curriculum) and the role of the Advanced Nurse Practitioner (ANP)

Plenary Session 2

**Sunday 11 July**  
**09:15 - 10:15**

**Location** Purple Area, Purple Room 8

**Chair** To be confirmed

**Learning objectives**

The delegates will be updated on the development of the international educational framework that BAUN, EAUN, and ANZUNS have been working on in recent years. You will also learn more on the role of the ANP/nurse specialist in Switzerland and how has this role developed over the last two decades.

---

**09:15 - 09:20**

**Introduction**

To be confirmed

---

**09:20 - 09:50**

**The Educational Framework for Urological Nursing (EFUN)**

To be confirmed

---

**09:50 - 10:05**

**The development of the role of the ANP in Switzerland**

To be confirmed

---

**10:05 - 10:15**

**Closing remarks**

To be confirmed

## Continenence Special Interest Group: New strategies for promoting patient education in urology

Thematic Session 11

Sunday 11 July  
10:30 - 11:30

**Location** Purple Area, Purple Room 8

**Chair** To be confirmed

### Learning objectives

Good communication and education is essential for the successful outcome of individualised nursing care of each patient. To achieve this, however, nurses must understand and help their patients, demonstrating courtesy, kindness and sincerity. Also they should devote time to the patient to communicate with the necessary confidentiality, and must not forget that this communication includes persons who surround the sick person, which is why the language of communication should be understood by all those involved in it. This session aims to support nurses in educating their patients by giving them practical examples on different educational techniques and programmes, e.g. suprapubic catheter, continence, etc.

10:30 - 10:35

### Introduction

To be confirmed

10:35 - 10:50

### Technology in patient education: An innovative project

To be confirmed

10:50 - 11:05

### Education in suprapubic catheter change: A 3D animation

To be confirmed

11:05 - 11:20

### Urinary tract infection (UTI) prevention in intermittent catheterisation: Guidelines and education

To be confirmed

11:20 - 11:25

### The continence song

To be confirmed

11:25 - 11:30

### Closing remarks

To be confirmed

## Poster presentations on research studies, problem-solving efforts and innovative programmes in urology

Poster Session

**Sunday 11 July**  
**10:30 - 12:00**

**Location**

Purple Area, Purple Room 7

**Learning objectives**

Presentations will take place on stage. Standard presentations are 2 minutes in length, followed by 2 minutes for discussion. Extended presentations are 4 minutes in length, followed by 2 minutes for discussion.

## Palliative and end of life care in urology - teamwork

Thematic Session 12

**Sunday 11 July**  
**13:00 - 14:00**

**Location** Purple Area, Purple Room 7

**Chair** To be confirmed

### **Learning objectives**

This session aims to give insight in the palliative care within urology from the medical and nurse's perspective. The SENS model in the interdisciplinary collaboration will be discussed. In the oncological urological care opiates are often used and addiction can be a problem. How can you cope with this?

**13:00 - 13:05**

### **Introduction**

To be confirmed

**13:05 - 13:15**

### **Palliative care - medical perspective**

To be confirmed

**13:15 - 13:25**

### **SENS model in interdisciplinary cooperation in palliative situations**

To be confirmed

**13:25 - 13:35**

### **Case presentation: Using the SENS model in urological care**

To be confirmed

**13:35 - 13:45**

### **Planning for the patient's palliative care needs in urological malignancy: The urology perspective**

To be confirmed

**13:45 - 13:55**

### **Opiate addiction after cancer**

To be confirmed

**13:55 - 14:00**

### **Closing remarks**

To be confirmed

## The emerging role of genomic screening in treatment decision-making

State-of-the-art Lecture 3

**Sunday 11 July**  
**14:15 - 14:45**

**Location** Purple Area, Purple Room 8

**Chair** To be confirmed

**Learning objectives**

With genetic screening for mutations and biomarkers gaining more prevalence in diagnosing and treating cancer, genetic testing and counseling for urological patients is becoming a pressing concept that urologists and nurses need to better understand.

---

**09:45 - 09:50**

**Introduction**

To be confirmed

---

**09:50 - 10:10**

**Genomics in bladder and prostate cancer**

To be confirmed

---

**10:10 - 10:15**

**Closing remarks**

To be confirmed

## Nurse-led management of male lower urinary tract symptoms (LUTS)

State-of-the-art Lecture 4

**Sunday 11 July**  
**14:15 - 14:45**

**Location** Purple Area, Purple Room 7

**Chair** To be confirmed

**Learning objectives**

The aim of this session is to describe the nursing role in the management of male LUTS.

---

**15:00 - 15:05**

**Introduction**

To be confirmed

---

**15:05 - 15:25**

**Nurse-led assessment and management of male non-neurogenic LUTS**

To be confirmed

---

**15:25 - 15:30**

**Closing remarks**

To be confirmed

## Improving quality of care: Getting It Right First Time (GIRFT)

State-of-the-art Lecture 5

**Sunday 11 July**  
**15:00 - 15:30**

**Location** Purple Area, Purple Room 8

**Chair** To be confirmed

**Learning objectives**

In the UK the "House of Lords Select Committee" report of April, 2017, posed that the biggest internal threat to the sustainability of the National Health Service (NHS) is the lack of a long-term strategy to secure an appropriately skilled, well-trained and committed workforce.

The aim of this session is to highlight the key findings and show that there is significant scope to improve the care delivered to our patients.

---

**14:15 - 14:20**

**Introduction to GIRFT - what, why and when**

To be confirmed

---

**14:20 - 14:40**

**GIRFT in urology**

To be confirmed

---

**14:40 - 14:45**

**Closing remarks**

To be confirmed

## The intersection of urology and sexuality

State-of-the-art Lecture 6

**Sunday 11 July**  
**15:00 - 15:30**

**Location**

Purple Area, Purple Room 7

**Chair**

To be confirmed

---

**14:15 - 14:20**

**Introduction**

To be confirmed

---

**14:20 - 14:40**

**Managing the sexual side effects of prostate cancer treatment**

To be confirmed

---

**14:40 - 14:45**

**Closing remarks**

To be confirmed
