Leading change in NMIBC monitoring - Insights from successful implementation of Bladder EpiCheck in clinical routine

Industry Workshop sponsored by NUCLEIX

Saturday 16 March
18:00 - 19:30

Location: Green Area, Room 19
Chair: J.A. Witjes, Nijmegen (NL)

18:00 - 18:05
Introduction
J.A. Witjes, Nijmegen (NL)

18:05 - 18:25
Bladder EpiCheck results - impact on my clinical practice
J.A. Witjes, Nijmegen (NL)

18:25 - 18:45
Utilization of cystoscopy, cytology and Bladder EpiCheck – when best to use each one and why?
S. Lerner, Houston (US)

18:45 - 18:55
Utilization of Bladder EpiCheck in high-risk population – experience from a large referral center
P.F. Bassi, Rome (IT)

18:55 - 19:05
Adding Bladder EpiCheck to cytology to improve NMIBC detection – experience from a regional public hospital
C. D'Elia, Bolzano (IT)

19:05 - 19:15
Bladder EpiCheck as a tool to reduce re-TURBT – pilot study results
R. Miano, Rome (IT)

19:15 - 19:25
Bladder EpiCheck in upper tract tumors - feasibility study results
A. Breda, Barcelona (ES)

19:25 - 19:30
Summary
J.A. Witjes, Nijmegen (NL)
