V. Scattoni, Milan (IT)
Tutors: A.B. Galosi, Fermo (IT)
T. Loch, Flensburg (DE)
G. Salomon, Hamburg (DE)
D. Yakar, ()

Aims and objectives of this session
Ultrasonography is an essential instrument in the management of urological patients, both in the diagnostic phase and during follow-up after treatment. It is an evolving technology with increasing performance. Since it is becoming cheaper and user friendly, it is more available in every urological office. The knowledge and the use of this method should be part of the standard background and armamentarium of each urologist.

This hands-on-course aims to provide urologists with the necessary baseline training to implement abdominal ultrasound as well as transrectal ultrasound of the prostate as a routine diagnostic tool in daily practice. It will provide basic information by short and concise lectures followed by extensive practical exercise.

Aim and objectives
• At the end of the course, the participants understand the advantages, handling and limitations of ultrasound in the urological practice.

Target audience: urologists, interested in the diagnostic ability of urological ultrasound
