Session 1: Microenvironment, metabolism and epigenetic reprogramming

Thursday 10 October 14:45 - 16:10

Location: Auditorium

Chairs: G. Jenster, Rotterdam (NL)
        G. Van Der Pluijm, Leiden (NL)

14:45 - 15:10
Phenotype-independent DNA methylation changes in prostate cancer
N.J. Maitland, York (GB)

15:10 - 15:30
The tumour-microenvironment as a barrier or enabler of the host immune response
G.G. Malouf, Strasbourg (FR)

15:30 - 15:50
MicroRNA expression and activity in the prostate cancer tumour microenvironment
S. Lupold, Baltimore (US)

15:50 - 16:10
The multifunctional role of the enzyme APE1/Ref-1 in bladder cancer: Growth, cell survival and muscle invasion
T. Jerde, Indianapolis (US)
