Aims and objectives of this session
The EST s1 (Endoscopic Stone Treatment step 1) is the first step of the training and assessment curriculum. Its structure offers a unique opportunity to those who want to learn the basics of endoscopy, with focus on urinary stone treatment. The EST s1 includes:
- Basic Hands-on Training (HOT) courses carried out under the guidance of experienced tutors
- A set of four dry lab exercises developed and validated by the ESU training group in collaboration with ESUT and EULIS
- EST s1 examination and certification
