Renal transplantation: Technical aspects, diagnosis and management of early and late urological complications

ESU Course 09

Saturday 18 July
08:30 - 10:30

Location: Grey Area, Room G106

Chair: F.J. Burgos Revilla, Madrid (ES)

Learning objectives of this session
Renal transplant is an essential part of urology. The aims of the course are:
• To show surgical techniques of organ procurement in deceased and living donation settings.
• To establish the basic principles for evaluation of candidates to donation and recipients of kidney graft.
• To show the different approaches and surgical details of kidney transplant in conventional and complex recipients.
• To review the algorithms for diagnosis and treatment of medical and surgical complications after kidney transplantation.

Introduction
F.J. Burgos Revilla, Madrid (ES)

Selection and urological preparation of transplant recipients. Surgical aspects of deceased donor nephrectomy
A.J. Figueiredo, Coimbra (PT)

Living donor nephrectomy: Technical alternatives and controversies
F.J. Burgos Revilla, Madrid (ES)

Renal transplantation. Surgical options: Tips and tricks
A.J. Figueiredo, Coimbra (PT)

How to diagnose and manage postoperative and long-term complications following renal transplantation
F.J. Burgos Revilla, Madrid (ES)
