Aims and objectives of this session
In the eUROGEN session we will highlight challenges in the care for rare uro-oncological diseases. As these are naturally infrequently encountered, we have invited experts from centers of expertise in centralized healthcare systems to provide surgical and non-surgical tips and tricks on a case-based approach. These lectures will highlight the complexity of dealing with rare and advanced oncological diseases in the genito-urinary system and the attendee is expected to take home an improved understanding on how to approach and when to refer these challenging cases.

10:40 - 11:00
Video based case discussion: Bulky penile cancer
Case presenter: B.E. Ayres, London (GB)
Expert: A. Muneer, London (GB)

11:00 - 11:20
Video based case discussion: Diagnostic work-up and surgical management of adrenal mass
Case presenter: B.E. Ayres, London (GB)
Expert: J.F. Langenhuijsen, Nijmegen (NL)

11:20 - 11:40
Video based case discussion: Retroperitoneal sarcoma
Case presenter: B.E. Ayres, London (GB)
Expert: J. Oates, Manchester (GB)

11:40 - 12:00
Video based case discussion: Post chemotherapy residual mass in testicular cancer
Case presenter: B.E. Ayres, London (GB)
Expert: A. Lusch, Duesseldorf (DE)

12:00 - 12:15
State of the art: Functional recovery in rare urogenital cancers; a reflection on lymphoedema treatment and physical rehabilitation
M. Stuiver, Amsterdam (NL)

12:15 - 12:30
State of the art: The role of micro RNA-371A-3P in personalised management of testicular cancer
A. Heidenreich, Cologne (DE)
