Joint Session of the European Association of Urology (EAU) and the Urological Society of Australia and New Zealand (USANZ)

Urology beyond Europe

Friday 20 March
09:45 - 12:15

Location: Grey Area, Room Emerald

Chairs: J.W.F. Catto, Sheffield (GB)
S. Mark, Christchurch (NZ)

Learning objectives of this session
In this Joint Session of the EAU and the Urological Society of Australia and New Zealand we will discuss patterns of practice in the different regions of the world. We start with a safe and efficient follow regimen for men with prostate cancer, which reduces face to face clinic visits and help compliance. We review the vexed issue of adjuvant radiation following prostatectomy, plus the causes of post-prostatectomy incontinence.

Mesh issues are rarely out of the press, and we discuss assessment and treatment modalities for mesh complications. Haematuria is a common condition, so rationalising patient assessment is vital. We will review a controversial presentation suggesting a further role for MRI, and present an overview of retroperitoneal fibrosis, often a conundrum in patient care. The session is rounded off by looking at the complex issue of implementation of the widely lauded EAU treatment guidelines into practice.

09:45 - 09:50
Introduction

09:50 - 10:05
Can prostate cancer databases safely reduce clinic numbers
S. Mark, Christchurch (NZ)

10:05 - 10:20
When and how to investigate haematuria?
J.D. Kelly, London (GB)

10:20 - 10:35
Mesh complications and their management – An international conundrum
To be confirmed

10:35 - 10:50
mpMRI for bladder cancer: Is it time to replace TURBT?
J.W.F. Catto, Sheffield (GB)

10:50 - 11:05
Prostate cancer in 2020: Re-imagining survivorship
S. Chambers, NSW (AU)

11:05 - 11:20
The role of adjuvant radiotherapy following radical prostatectomy in men with high risk disease
P. Boström, Turku (FI)
