Surgical management of male LUTS: Indications, techniques and complications
Expert-Guided Poster Tour 12

Sunday 19 July
13:00 - 15:00
Location: Green Area, Room B
Chairs: To be confirmed
To be confirmed

The Expert-Guided Poster Tour is an innovative session type. The Tour aims to provide an interactive platform informing delegates on the real essentials and providing in-depth information on the different research projects. Poster viewing of 30 minutes after which two experts, will ask questions to individuals and groups of poster presenters.

PT311
Can machine-learning (ML) augmented audio-uroflowmetry distinguish between normal and abnormal flows from voiding sounds?
By: Aslim E.J.¹, Balamurali B.T.², Ng Y.S.L.¹, Kuo T.L.C.¹, Chen J.S.², Chen J.³, Ng L.G.¹
¹Singapore General Hospital, Dept. of Urology, Singapore, Singapore, ²Singapore University of Technology and Design, Information Systems Technology and Design, Singapore, Singapore, ³Singapore University of Technology and Design, Science and Math, Singapore, Singapore

PT312
Modified Visual Prostate Symptom Score (M-VPSS) – a new tool for evaluation of lower urinary tract symptoms (LUTS) due to benign prostatic enlargement (BPE) in men
To be confirmed

PT313
Bladder outlet obstruction in male LUTS: A non-invasive algorithm
To be confirmed

PT314
Assessment of bladder outlet obstruction in men: A new diagnostic model based on non-invasive urodynamic parameters
To be confirmed

PT315
Highly biased and misleading: Information on surgical treatment of benign prostatic hyperplasia on YouTube
To be confirmed

PT316
Surgical performance of greenlight laser therapy for benign prostatic hyperplasia: Preliminary results in terms of operative profile, safety and functional outcomes from a retrospective multicenter Italian database study
¹S. Maria delle Croci Hospital, Dept. of Urology, Ravenna, Italy, ²Ss. Annunziata Hospital, Dept. of Urology, Chieti, Italy, ³Humanitas Gavazzeni Hospital, Dept. of Urology,
Bergamo, Italy, Sant’Andrea Hospital, Sapienza University, Dept. of Urology, Roma, Italy, Azienda Ospedaliera Città della Salute e della Scienza – Sede Molinette, University of Torino, Dept. of Urology, Torino, Italy, Arcispedale Santa Maria Nuova, Dept. of Urology, Reggio Emilia, Italy, S. Lazzaro Hospital, Dept. of Urology, Alba, Italy, Rovereto Hospital, Dept. of Urology, Rovereto, Italy, Ulivella E Glicini Clinic, Dept. of Urology, Florence, Italy, Careggi Hospital, University of Firenze, Dept. of Urology, Florence, Italy, Clinica urologica azienda ospedaliera - University of Padova, Dept. of Urology, Padova, Italy, S. Giovanni Evangelista Hospital, Dept. of Urology, Tivoli, Italy, Santa Croce E Carle Hospital, Dept. of Urology, Cuneo, Italy, University of Bari, Emergency and Organ Transplantation, Urology and Andrology Unit II, Bari, Italy, Ospedale Civile di Guastalla ed Ospedale Ercole Franchini di Montecchio Emilia, Azienda USL-IRCCS, Dept. of Urology, Reggio Emilia, Italy, Aorn Cardarelli Hospital, Dept. of Urology, Napoli, Italy, S. Giacomo Hospital, Dept. of Urology, Novi Ligure, Italy, University of Rome Tor Vergata, Dept. of Urology, Roma, Italy, Hesperia Hospital, Dept. of Urology, Modena, Italy, Villa Stuart Private Hospital, Dept. of Urology, Roma, Italy

PT317 Bipolar versus monopolar transurethral resection of the prostate for lower urinary tract symptoms secondary to benign prostatic obstruction: A Cochrane systematic review and meta-analysis

By: Alexander C.¹, Scullion M.¹, Omar M.I.¹, Yuan Y.², Mamoulakis C.³, N’Dow J.¹, Chen C.⁴, Lam T.¹
¹University of Aberdeen, Academic Urology Unit, Aberdeen, United Kingdom,²McMaster University, Dept. of Medicine, Hamilton, Canada,³University of Crete Medical School, Dept. of Urology, Heraklion, Greece,⁴Sun Yet-Sen University, Dept. of Urology, Guangzhou, China

PT318 Enucleation vs. resection: A matched-pair analysis of TURP, HoLEP and bipolar TUEP
To be confirmed

PT319 HoLEP vs. TURP for patients with medium-sized prostates (50cc) treated for male LUTS - a matched-pair analysis
To be confirmed

PT320 A randomized trial comparing high power Thulium laser vaporization versus monopolar transurethral resection of the prostate for treatment of small to moderate sized benign prostatic obstruction: A preliminary report
To be confirmed

PT321 En-Bloc Moses Laser Enucleation of Prostate (En-Bloc MoLEP)

Instituto de Cirugía Urológica Avanzada (ICUA), Dept. of Urology, Madrid, Spain

PT322 Diabetes may compromise the functional outcomes of GreenLight laser XPS-180W photoselective vaporization of the prostate
To be confirmed

PT323 Absence of metabolic syndrome, preoperative urinary symptoms and flow predict positive trifecta outcome after transurethral resection of prostate: Development of a
