Focal therapy of prostate cancer: Short and intermediate term outcomes
Poster Session 64

Location: Green Area, Room 5
Chairs: To be confirmed
To be confirmed
To be confirmed

Poster viewing of 20 minutes. Presentations will take place on stage. Standard presentations are 2 minutes in length, followed by 2 minutes for discussion.

878 Assessing focality of dominant tumor on serial biopsy in an active surveillance cohort - implications for focal therapy
By: Fasulo V. 1, Cowan J.E. 1, Washington S.L. 1, Nguyen H.G. 1, Shinohara K. 1, Casale P. 2, Carroll P.R. 1
1University of California, San Francisco, Dept. of Urology, San Francisco, United States of America, 2Humanitas Clinical and Research Hospital, Dept. of Urology, Rozzano, Italy

879 Is focal ablation as effective as hemi-ablation? Analysis of treatment patterns over 12 years from a high volume centre for focal therapy
To be confirmed

880 Primary focal- versus whole-gland cryoablation for intermediate- and high-risk prostate cancer
To be confirmed

881 Oncological and functional outcomes of image-guided cryotherapy for the treatment of localised prostate cancer: Results from a high-volume centre
By: Fernandez Pascual E. 1, Quintana Franco L.M. 2, Martínez-Ballesteros C. 1, Linares Espínós E. 1, Martín Vivas C. 1, Castillo E. 1, Bianco F. 3, Martínez-Salamanca J.I. 1
1Lyx Institute of Urology, Dept. of Urology, Madrid, Spain, 2La Paz University Hospital, Dept. of Urology, Madrid, Spain, 3Urology Associates, Dept. of Urology, Miami, United States of America

882 Focal laser ablation versus radical prostatectomy for localized prostate cancer: Survival outcomes from a matched cohort
To be confirmed

883 Pivotal trial of MRI-guided transurethral ultrasound ablation in men with localized prostate cancer: Two-year follow-up
1Sunnybrook Health Sciences Center, Dept. of Urology, Toronto, Canada, 2London Health Sciences Center, Dept. of Urology, London, Canada, 3Heidelberg University Hospital,
Five-year outcomes from a prospective phase I study of MRI-guided transurethral ultrasound ablation in men with localized prostate cancer

1University of Western Ontario, Urology Division, Dept. of Surgery, London, Canada, 2University Hospital Heidelberg, Dept. of Urology, Heidelberg, Germany, 3Beaumont Health System, Dept. of Urology, Royal Oak, United States of America, 4German Cancer Research Centre (DKFZ), Division of Radiology, Heidelberg, Germany, 5University of Western Ontario, Dept. of Medical Imaging, London, Canada, 6Profound Medical Inc., Dept. of Clinical Affairs, Toronto, Canada

Hemi-gland high intensity focus ultrasound ablation for prostate cancer: Short-term outcomes from one of the largest US series

To be confirmed

Focal therapy for localized prostate cancer with mpMRI/US fusion-guided radiofrequency ablation: Oncologic and functional outcomes

To be confirmed

A novel focal therapy – microwave ablation under Organ-Based Tracking (OBT) fusion in patients with localized prostate cancer: Preliminary results of FOSTINE 01b pilot study

To be confirmed

5 year progression results from a phase-3 prospective randomized trial of vascular-targeted photo-therapy versus active surveillance for low-risk prostate cancer

To be confirmed
| 889 | Irreversible electroporation for local prostate cancer: Oncological and functional outcomes | To be confirmed |
| 890 | Focal brachytherapy for localized prostate cancer: Mid-term outcomes | To be confirmed |
| 891 | The relationship between percentage PSA reduction and rate of failure after focal therapy for prostate cancer | To be confirmed |
| 892 | Focal therapy compared to radical prostatectomy for non-metastatic prostate cancer: A propensity matched study | To be confirmed |
