Overview of fusion biopsy devices

Thematic Session 08

Sunday 18 March
10:30 - 12:00

Location: Blue Area, Room 3 (Level 0)

Chairs: E. Barret, Paris (FR)
J. Walz, Marseille (FR)

Aims and objectives of this session
MRI and MRI/ultrasound fusion system is increasingly used in patients undergoing prostate biopsies. Different MRI/Ultrasound fusion devices are available. Often it is unclear where the advantages and disadvantages of the different systems are and there is a lack of clear head to head comparison between the different systems. The aim of this thematic session is to systematically present the different fusion technologies and to highlight their pros and cons. This will be followed by a round table discussion where several clinical cases will challenge the different technologies.

10:30 - 10:40
Possible ways to refine prostate biopsy
M. Valerio, Lausanne (CH)

10:40 - 10:45
Statement MIM-Symphony
V. Kasivisvanathan, London (GB)

10:45 - 10:50
Statement Biojet
M. Drerup, Salzburg (AT)

10:50 - 10:55
Statement Ascendus
H. Cash, Berlin (DE)

10:55 - 11:00
Statement BioBot
S. Kruck, Tübingen (DE)

11:00 - 11:05
Statement Urostation
A. Peltier, Brussels (BE)

11:05 - 11:10
Statement Artemis
J. Von Hardenberg, Mannheim (DE)

11:10 - 11:15
Statement UroNav
L.P. Boesen, Herlev (DK)

11:15 - 12:00
Round table discussion
