Prostate cancer update: How to optimise the everyday management of your patients
ESU Course 49

Location: Orange Area, Room 7 (Level 0)
Chair: F. Montorsi, Milan (IT)

Aims and objectives of this session
The course is aimed at critically reviewing key papers published during the previous 12 months and devoted to the management of prostate cancer patients with a particular focus on diagnosis, staging, local treatments and systemic therapies. Practice-changing manuscripts published in peer-reviewed journals will be identified and discussed for each topic. For every paper a clear take home message applicable to the every-day clinical practice will be identified and discussed.
At the end of the course participants will be informed on the latest and most significant novelties related to the contemporary management of prostate cancer patients.

Screening and early detection: The role of PSA and novel biomarkers
F. Montorsi, Milan (IT)

Diagnostic evaluation: The role of multiparametric magnetic resonance imaging and target biopsies
M. Graefen, Hamburg (DE)

Staging and predictive models
C.P. Evans, Sacramento (US)

Treatment of clinically localized prostate cancer: Short- and long-term outcomes of radiotherapy, brachytherapy and focal therapy
M. Graefen, Hamburg (DE)

Treatment of clinically localized prostate cancer: Short- and long-term outcomes of radical prostatectomy
F. Montorsi, Milan (IT)

Management of biochemical and clinical recurrence after treatment with curative intent
M. Graefen, Hamburg (DE)

Systemic therapies in hormone-sensitive and castration-resistant prostate cancer
C.P. Evans, Sacramento (US)
