Aims and objectives of this session
- Provide an update on recent imaging techniques like TRUS, Elastography, Histoscanning, multiparametric magnetic resonance imaging (mpMRI) and nuclear imaging techniques for prostate cancer diagnosis.
- Explain standard reporting systems for ultrasound and mpMRI like PI-RADS.
- Discuss different prostate biopsy techniques.
- Tips and Tricks to reduce morbidity of prostate biopsies.

Indications for TRUS and biopsy
P. Hammerer, Braunschweig (DE)

Practical aspects of TRUS and TRUS-guided biopsies
P. Hammerer, Braunschweig (DE)

Indications for rebiopsy
C. Moore, London (GB)

Update on new technical developments
C. Moore, London (GB)
